

SM HRMS

User Guide

Everything your team needs, in one app

Contents

1. Getting started — sign up and set up your organization
2. For every employee
 - 2.1 Attendance — GPS and selfie check-in
 - 2.2 Leave — apply, track balance, buddy system
 - 2.3 Tasks — checklist and delegation
 - 2.4 Field visits
 - 2.5 Employee directory
 - 2.6 Help desk
 - 2.7 My profile
3. For the admin / owner
 - 3.1 Team — add, manage, disable, offboard
 - 3.2 Organization — departments, branches, leave types
 - 3.3 Payroll — salary, deductions, slips
 - 3.4 Settings — policies for attendance, leave and payroll
 - 3.5 Reports & exports
4. Tips, shortcuts and FAQ

1. Getting started

SM HRMS is built for one organization at a time — when you sign up, you create your own private workspace. Nobody outside your company can see your data.

Create your account

- Go to your SM HRMS sign-up page and enter your name, work email and a password.
- Confirm your email using the link that's sent to you.
- You'll land on **Set up your organization** — enter your company name, industry and team size.
- Your **7-day free trial** starts immediately. No card is needed to begin.

Add your team

Once your organization exists, go to **Team** → **Add member**. Enter their name, email and mobile number, choose or generate a password, and pick their role, department, designation and reporting manager. A credentials card appears once — copy it and share it with the employee securely.

Signing in

Everyone signs in with either their **email or mobile number** plus their password. If an employee forgets their password, they ask their manager or admin to reset it from **Team**. If an owner or admin forgets theirs, they use **Forgot password** for an email OTP.

2. For every employee

These features are available to everyone on your team, from day one.

2.1 Attendance — GPS and selfie check-in

Open **Attendance** and tap **Check in**. The app captures your location, reverse-geocodes it into a readable address, and — if your admin has turned this on — asks for a live selfie through your camera. If your company has set an office location, you'll see whether you checked in **inside** or **outside** the office, and by how many metres. **Check out** the same way at the end of the day to record your hours.

Your attendance history is filterable by date range, and you can view any day's full activity log — time, photo, address and map link — by tapping on it.

2.2 Leave — apply, track balance, buddy system

Open **Leave** to see your balance for every leave type your company offers (Casual, Sick, Earned, Privilege, or whatever your HR has configured) — with how many days you've used and how many remain. Tap **Apply for leave**, choose the duration (full day, half day, short leave or work-from-home), the dates and a reason.

Your balance updates the moment you apply — if the request is later rejected, the days are automatically returned. If your company uses the **buddy system**, you'll be asked to nominate a colleague to cover your work while you're away; they get a notification to accept or decline.

2.3 Tasks — checklist and delegation

Delegation covers one-time tasks assigned to you with a due date and time — mark them done, and the app tracks whether you finished on time. **Checklist** covers recurring work (daily, weekly, monthly and so on) that your manager has set up for you — new occurrences appear automatically, shifted to the next working day if they'd otherwise fall on a holiday.

2.4 Field visits

If your role involves visiting clients or sites, use **Field visits** to log each visit with the client's name and purpose. Check in and out with GPS so your manager can see exactly where and when the visit happened.

2.5 Employee directory

Find any colleague under **Team** — search by name, role or department to get their designation, department and contact details (subject to what your company chooses to show).

2.6 Help desk

Raise a ticket for any IT, HR, payroll or facilities issue under **Help desk**. Track its status, see the resolution plan once your admin adds one, and reply directly in the conversation thread.

2.7 My profile

Upload a profile photo, add your date of birth (so the team can wish you on your birthday) and keep your mobile number up to date, all under **My profile** — click your name at the bottom of the sidebar.

3. For the admin / owner

As the person who set up the organization (or someone given the admin role), you have full control over your company's structure, policies and data.

3.1 Team — add, manage, disable, offboard

Add employees, reset their passwords, and open any employee's **Profile** to fill in their address, bank details and upload KYC documents. From the same screen you can **disable** an account (they can't sign in or touch any company data until re-enabled) or **mark them as left** when they exit — their historical records stay on file under the **Left** tab.

3.2 Organization — departments, branches, leave types

Set up your company's **departments**, **designations** and, if you run more than one location, **branches** — each with its own optional office geofence. Define your own **leave types** (their codes, names and annual quotas) and choose which leave durations employees are allowed to apply for. Turn the **buddy system** on or off, and decide whether it's mandatory.

3.3 Payroll — salary, deductions, slips

Set each employee's **salary** under Salary Master. Every month, **Payroll** computes attendance, late arrivals, leave and absences automatically against the rules you set, and shows the payable days and net salary per employee. Raise a manual deduction — for leave taken without applying, for example — and approve it against CL, PL, EL or straight from salary. Print an individual **salary slip** or a full report covering every employee.

3.4 Settings — policies for attendance, leave and payroll

This is where every rule in the app is configured: the grace period before someone is marked late, the office location and radius for geofencing, whether a selfie is required for none, some or all employees, how many free late arrivals and short leaves are allowed before an automatic deduction kicks in, and who can see the employee directory.

3.5 Reports & exports

Export attendance to Excel or a printable PDF for any date range, print a full payroll report for the month, or open **Team leave balances** to see and adjust every employee's balance in one screen, with their complete leave history one click away.

4. Tips, shortcuts and FAQ

Switch between light and dark mode

Use the sun/moon icon at the top of any page. Your choice is remembered on that device.

I forgot my password

Employees: ask your admin or reporting manager to reset it from Team. Owners/admins: use Forgot password on the sign-in page for an email code.

Why does my leave balance show a pending amount?

Applying for leave deducts from your balance immediately, before it's approved. If it's rejected, the days are automatically credited back — no action needed from you.

My photo or location wasn't captured at check-in

Make sure you've allowed camera and location permissions for the site in your browser settings, then try again.

Who can see my data?

Only people inside your own organization — never anyone from another company using SM HRMS. Within your company, what a colleague can see about you (email, phone, department) is controlled by your admin under Settings.
